Dr. Joshua Lederberg
Dept. of Genetics
Stanford University School of Medicine
Stanford Medical Center
Palo Alto, California 94304

Dear Dr. Lederberg:

I called you some time ago leaving word that the group with the patients in Cologne were quite interested in using the Shope on the patients with argininemia. The subsequent delay has been Carbide, AEC, and NIH clearance and the fact that my passport had run out. I just heard from them again today and we have set up a meeting Jan. 16. The test should begin shortly after that. I have already, sometime ago, sent purified virus to Dr. van Sande in Antwerpen who had cells from the kids in culture. We should know soon how this comes out.

Did you see the last (Dec. 12) issue of Science. It looks like LSD has gone by the board - it will never compete with PCPA! The Pill became operational just in time!

I will keep you informed. Wishing you a happy holiday season.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "Stanfield Rogers".
